

# Waze project proposal

## Overview

Waze leadership has asked the data team to build a machine learning model to predict user churn. The model is based on data collected from users of the Waze app.

**Note:** The estimated times for the milestones in the example equate to the length of the courses where you will learn the necessary skills. The project timeline would most likely have tighter deadlines in a professional context involving actual clients and data scientists. For example:

Milestone 1: 1-2 days  
Milestone 2: 2-3 weeks  
Milestone 3: 1 week  
Milestone 4: 1 week  
Milestone 5: 1-2 weeks
